HOW WE GET PAID

APPRAISE

Establish an accurate market value for the machine based on current sales, market demand and machine inspection/certification.

AGREE

Determine the "in your pocket" price you need to sell your machine

PROTECT

Our goal is to make between 6-12% on each sale. However, we will reduce our fee to as low as 2% to protect your "in your pocket" price.

SHARE

If we can sell the machine for more than 10% - we will share the excess 50/50 with you.

GET CERTIFIED & STAND OUT IN THE CROWD

Certification gets you noticed, builds trust with buyers and maximizes your selling potential.
